Experience

IT Data Management Intern <i>Staff Domain – Internship</i>	January 2026 – June 2026
- Orchestrated the migration and schema restructuring of 20,000+ hardware and software asset records from unstandardized legacy spreadsheets into a normalized Snipe-IT relational database. - Implemented rigorous automated validation and cleansing routines via PowerShell and CLI scripts, maintaining full relational integrity and eliminating 100% of duplicate asset records. - Accelerated IT provisioning latency by 80% by standardizing operational database schemas, audit fields, and asset tracking models. - Designed audit queries in SQL to monitor operational reporting anomalies, reconcile entity metadata across Zoho CRM and Snipe-IT, and streamline enterprise lifecycle tracking.	

Projects

Social Media Analytics Pipeline & Dashboard <i>Python, PostgreSQL, SQLAlchemy, Chart.js</i>	August 2026
- Architected an automated ETL pipeline using Python, Pandas, and SQLAlchemy 2.0 to ingest REST API feeds into a hybrid PostgreSQL schema (B-Tree indexed columns + raw JSONB lossless storage). - Implemented <code>ON CONFLICT DO UPDATE</code> idempotent upserts, schema normalization, and built an interactive 1-page web visualizer with Chart.js rendering 6 multi-dimensional analytical graphs.	
Early Bird Job Intelligence Dashboard <i>Python, SQLite, Gemini AI, Pandas</i>	October 2026
- Engineered an automated career intelligence pipeline scraping multi-platform job feeds (LinkedIn, Jobstreet, Indeed), executing SHA deduplication and structured segregation into SQLite WAL storage. - Integrated Google Gemini AI for semantic candidate qualification matching and vector scoring against profile requirements, automating daily HTML analytical digest dispatching.	
Four-in-One Vital Sign Telemetry & Anomaly Pipeline <i>Python, MySQL, XGBoost, PyTest</i>	June 2025 – May 2026
- Engineered a scalable telemetry ingestion pipeline using Flask and MySQL to capture, validate, and structure time-series sensor feeds from 5 biomedical streams with sub-second latency. - Built and evaluated predictive risk assessment models using XGBoost and statistical testing (paired t-tests) to classify physiological metrics and identify abnormal vital sign variations.	
Corporate Ticketing System <i>Python, PostgreSQL, SQL, psycopg2</i>	June 2026
- Architected a normalized relational PostgreSQL schema (<code>ticketing_system</code>) with foreign key integrity, psycopg2 connection pooling, and multi-column B-Tree indexing on department queues. - Engineered high-performance parameterized SQL aggregation queries and audit logging for triage bottleneck metrics, serving operational queue analytics under 150ms.	

Certifications

Associate Data Engineer <i>DataCamp (ID: DEA0017096233010)</i>	August 2026
Timed competency credential validating production-level data pipeline orchestration, database management, and query optimization.	
Associate Data Analyst <i>DataCamp</i>	August 2026
Assessment-based certification covering advanced PostgreSQL querying, complex aggregations, window functions, and analytics transformation.	
Data Fundamentals <i>IBM SkillsBuild & TESDA</i>	July 2026
Enterprise credential covering cloud data architecture, relational systems, cleansing lifecycles, and predictive analytics pipelines.	
Python Essentials 1 <i>Cisco Networking Academy & OpenEDG</i>	July 2026
Validated programming proficiency in OOP principles, modular package design, algorithm development, and exception handling.	

Technical Skills

Programming Languages: Python, SQL (PostgreSQL, MySQL, SQLite), Bash, PowerShell	
Data Engineering & ETL: ETL/ELT Pipelines, SQLAlchemy 2.0, PostgreSQL JSONB, Schema Design (3NF, Star Schema), Data Cleansing, Data Migration, ACID Transactions, Idempotent Upserts	
Data Analytics & Machine Learning: Pandas, NumPy, XGBoost, Statistical Hypothesis Testing (Paired t-test), Power BI, Tableau, Advanced Excel, Google Gemini AI	
Databases & Tools: PostgreSQL, MySQL, SQLite, Snowflake, Docker, DBeaver, Supabase, Zoho Ecosystem, Git/GitHub, Linux	

Education

Bachelor of Science in Computer Engineering <i>Rizal Technological University</i>	Graduated – July 2026
- Cumulative General Weighted Average (CGWA): 1.73 Dean's List Academic Honor Awardee - Specialization in Data Architecture, Applied Machine Learning, and Embedded IoT Systems
