Experience

IT Developer Intern | Staff Domain – Internship

January 2026 – June 2026

- Programmed modular automation tooling and CLI scripts in PowerShell to automate workstation configurations, environment setup, and routine systems diagnostics.
- Developed automated ETL data migration scripts mapping 20,000+ unstandardized asset records into relational database structures with zero downtime.
- Supported web system integrations and automated workflow triggers across the Zoho ecosystem (Zoho CRM, Zoho Desk, Zoho Flow), debugging backend data exchanges and tracking defects in Jira.
- Built and deployed custom scripting solutions to interface with Active Directory and Azure AD APIs, automating credential and endpoint provisioning workflows.

Projects

Corporate Ticketing System | FastAPI, Python, PostgreSQL, Vanilla JS, PyJWT

June 2026

- Architected a high-throughput ticketing engine with asynchronous FastAPI REST APIs, Uvicorn ASGI, and PostgreSQL with psycopg2 connection pooling, maintaining sub-150ms query response times.
- Implemented zero-trust RBAC with bcrypt and stateless PyJWT authentication, automated Gmail IMAP ingestion over SSL with RFC822 deduplication, and a responsive Vanilla ES6+ glassmorphic UI.

US Goods PasaBuy E-Commerce Platform | Next.js, TypeScript, PostgreSQL, Prisma, Tailwind CSS

October 2026

- Architected a full-stack e-commerce web platform in Next.js 14 (App Router) and TypeScript with Prisma ORM and PostgreSQL, featuring dynamic landed cost pricing engines and 50% split-deposit payment workflows.
- Implemented Next.js Edge Middleware for strict RBAC route cloaking (rewriting unauthorized admin routes to 404), along with an administrative 6-stage order tracking pipeline and payment verification queue.

Four-in-One Vital Sign Kiosk & Website System | Python, Flask, MySQL, React.js, PyTest

June 2025 – May 2026

- Architected a 3-tier backend service in Flask and designed relational MySQL schemas to ingest, index, and query health telemetry from 5 serial sensor streams with sub-second latency.
- Developed responsive web interfaces in React.js, secured remote telemetry access via Tailscale mesh VPN, and validated system reliability under ISO/IEC 25010 standards using PyTest.

Social Media Analytics Pipeline & Dashboard | Python, PostgreSQL, SQLAlchemy, Chart.js

August 2026

- Architected an automated ETL pipeline using Python, Pandas, and SQLAlchemy 2.0 to extract REST API feeds into a hybrid PostgreSQL schema with relational indexing and lossless JSONB storage.
- Built an interactive single-page web visualizer with Chart.js and Tailwind CSS featuring 6 analytical graphs, live pipeline simulation controls, and formatted JSONB payload inspection.

Early Bird Job Intelligence Dashboard | Python, FastAPI, Gemini AI, SQLite, Tailwind CSS

October 2026

- Engineered an automated career intelligence pipeline scraping LinkedIn, Jobstreet, and Indeed, segregating listings via deduplication hashing into an SQLite WAL database.
- Integrated Google Gemini AI for semantic candidate qualification scoring and built a FastAPI web dashboard with automated daily 08:00 AM HTML email digest notifications.

Certifications

Python Essentials 1 | Cisco Networking Academy & OpenEDG

July 2026

- Validated programming proficiency in OOP principles, modular package design, algorithm development, and exception handling.

Associate Data Engineer | DataCamp (ID: DEA0017096233010)

August 2026

- Timed competency credential validating database management, query optimization, and production pipeline execution.

Data Fundamentals | IBM SkillsBuild & TESDA

July 2026

- Validated understanding of relational systems, software architectures, and database design.

Technical Skills

Programming Languages: Python, JavaScript, TypeScript, C#, C++, SQL, Bash, PowerShell, HTML/CSS

Full-Stack & Backend Frameworks: Next.js, React.js, FastAPI, Flask, Node.js, RESTful APIs, Tailwind CSS, Bootstrap

Databases & ORM: PostgreSQL, MySQL, Prisma ORM, SQLAlchemy, SQLite, Supabase, Relational Modeling

DevOps, Tooling & Environments: Git/GitHub, Docker, Linux, Vercel, Postman, PyTest, Zoho (CRM, Desk, Flow), CI/CD Pipelines

Education

Bachelor of Science in Computer Engineering | Rizal Technological University

Graduated – July 2026

- Cumulative General Weighted Average (CGWA): 1.73 | Dean's List Academic Honor Awardee
- Specialization in Software Systems, Applied Machine Learning, and Data Architecture
