Experience

IT Administrator and Operation | *Staff Domain – Internship* January 2026 – June 2026

- Spearheaded data migration of 20,000+ hardware and software assets from unstandardized legacy spreadsheets into a centralized Snipe-IT relational database, reducing onboarding provisioning latency by 80%.
- Executed functional QA testing, regression verification, and bug lifecycle tracking for internal ITMS modules in Jira, directly contributing to core infrastructure stability.
- Engineered modular automation scripts in PowerShell and CLI to accelerate workstation diagnostics, policy configuration, and routine operational maintenance.
- Configured enterprise endpoints and identity access using Active Directory and Azure AD, resolving networking tickets across TCP/IP, DNS/DHCP, and VPN interfaces.

Projects

Four-in-One Vital Sign Sensor Kiosk with AI & IoT | *Python, MySQL, React.js, YOLOv11* June 2025 – May 2026

- Engineered a 3-tier backend service using Flask and MySQL, developing RESTful APIs and serial data streaming pipelines to synchronize real-time telemetry from 5 embedded biomedical sensors with sub-second latency.
- Designed and deployed an automated risk assessment pipeline utilizing XGBoost and YOLOv11 computer vision models for posture compliance, automated subject verification, and physiological anomaly detection.
- Developed responsive frontend interfaces in React.js, secured remote deployment telemetry access via Tailscale mesh VPN, and validated comprehensive system reliability under ISO/IEC 25010 standards using PyTest.

Social Media Analytics Automated ETL Pipeline | *Python, PostgreSQL, Pandas, Docker, cron* August 2026

- Architected an end-to-end data pipeline extracting multi-platform metrics, executing automated data validation, schema normalization, and programmatic cleaning routines using Python and Pandas.
- Automated scheduled batch ingestion workflows into PostgreSQL with containerized Docker deployments, logging pipeline health metrics while maintaining strict ACID transactional integrity across 10,000+ records.

Web-Based Ticketing & Queue Analytics System | *Python, Flask, SQL, JavaScript, Vercel* June 2026

- Architected a full-stack support ticketing engine featuring relational SQL storage, role-based access control, and automated issue routing pipelines to accelerate cross-department ticket resolution.
- Engineered real-time queue analytics dashboards to monitor operational bottleneck metrics, cutting support triage latency by 40% and serving automated backend analytical queries under 150ms.

AI Kilo Bot | *Python, Raspberry Pi, YOLO, Roboflow, Sensor Fusion, HX711* December 2025

- Architected an intelligent digital scale combining overhead video camera feeds with strain-gauge load-cell telemetry; built ingestion pipelines merging YOLO object classification with mass data for instant billing.
- Calibrated dual HX711 ADC modules to 2g measurement tolerance and optimized edge model inference down to 65ms on Raspberry Pi hardware, enabling low-latency automated item checkout computation.

Certifications

Associate Data Engineer | *DataCamp (ID: DEA0017096233010)* August 2026

- Timed competency credential validating production-level data pipeline orchestration, database management, and query optimization.

Associate Data Analyst | *DataCamp* August 2026

- Assessment-based certification covering advanced PostgreSQL querying, complex aggregations, window functions, and analytics transformation.

Data Fundamentals | *IBM SkillsBuild & TESDA* July 2026

- Enterprise credential covering cloud data architecture, relational systems, cleansing lifecycles, and predictive analytics pipelines.

Python Essentials 1 | *Cisco Networking Academy & OpenEDG* July 2026

- Validated programming proficiency in OOP principles, modular package design, algorithm development, and exception handling.

Technical Skills

Programming Languages: Python, SQL, C#, JavaScript, TypeScript, Bash, PowerShell, Java, C++, HTML/CSS

Data Engineering & Architecture: PostgreSQL, MySQL, Snowflake, ETL/ELT Pipelines, Relational Schema Design, Star/Snowflake Schema, Data Migration, Query Optimization

Data Analytics & Machine Learning: Pandas, XGBoost, YOLOv11, Statistical Hypothesis Testing (Paired t-test), Power BI, Tableau, Advanced Excel

Software Engineering & DevOps: Docker, Git/GitHub, REST APIs, CI/CD, React.js, Node.js, Flask, Vercel, Supabase, Linux, Azure AD, Tailscale VPN

Networking, QA & Tooling: TCP/IP, DNS/DHCP, Active Directory, Postman, DBeaver, PyTest, Jira Bug Lifecycle Tracking, ISO/IEC 25010

Education

Bachelor of Science in Computer Engineering | *Rizal Technological University* Graduated – July 2026

- Cumulative General Weighted Average (CGWA): 1.73 | Dean's List Academic Honor Awardee
- Specialization in Data Architecture, Embedded IoT Systems, and Applied Machine Learning
